

Softworld Take-Off for Launch of Topaz Financials Announcements

Topaz will be promoting an 'enterprise accreditation first', new enhancements and partnership announcements for Topaz Financials at Softworld. A whole host of user-friendly functionality, e-filing capability and third party product partnership links are scheduled to be highlighted on Stand AF312 during the October 17 and 18 event hosted at the NEC Birmingham.

Softworld will also see Topaz announce -

- HMRC accreditation for VAT E-Filing (VAT 100 and VAT 101) – the first and only enterprise software provider to achieve this
- Topaz Purchase Invoice Archiving – for companies that need to scan documents such as invoices without the major outlay of document management provision
- A partnership with Prophix – providers of a budgeting, planning, forecasting, reporting, consolidation technology – that follows hot on the heels of a link up with Credit IQ, the leading invoice discount technology product

"During the past 12 months there has been a great deal of interest in Topaz Financials following a raft of enhancements last year, including factoring functionality and extended escalation process within the authorisation kiosk, and we are looking to build on this momentum," says Eddie Stanley, Topaz Sales Director.

"We are convinced that the latest additions to Topaz Financials and our partnership with Prophix will ensure our product is a major attraction for the visitors at Softworld.

"During the event we will be looking to generate further sales leads by promoting the full range of user-friendly and accredited functionality within the product, as well as highlighting examples where the software has dramatically reduced reporting times and paid for itself within two years."

Meanwhile Topaz will also use the Softworld platform to highlight groundbreaking capability within Topaz Credit Control, which can either be utilised in conjunction with Topaz Financials or as a standalone product with other accounting software.

The advanced pro-active solution has been promoted in a number of initiatives during the past year including a recent workshop entitled 'Profit Through Credit Management' at the Marriott Hanbury Manor Hotel and Country Club, Hertfordshire. This followed on from a seminar hosted by the Institute of Directors entitled 'Reducing Debtor Days, Minimising Risk and Improving Customer Service – How the Recruitment Sector is Tackling These 3 Key Issues' that highlighted the growing impact of the Topaz technology in the recruitment sector.

"Our initiatives to promote the pro-active functionality of Topaz Credit Control during the past 12 months have been very successful in creating a great deal of interest in the product, particularly in the recruitment sector, and it will also be another main draw to our Softworld stand," says Eddie Stanley.

Notes to Editors:

About Topaz

Topaz was founded by a group of like-minded business professionals and began life creating bespoke software solutions and supporting third party applications. At the core of Topaz business solutions are software applications that have been developed by its highly experienced team of software engineers. From inception to delivery, Topaz solutions are produced with the highest level of professionalism.

The company's many years of experience in software development to formal specifications produce both highly flexible packaged solutions and bespoke applications. Topaz's strict quality procedures ensure software is produced to high, exacting standards to a common template that has evolved over many years.

Topaz EMS is an integrated Payroll and HR solution with an optional Time and Attendance module, its inherent flexibility and ease of use. Lends itself to many different sectors of the market providing numerous time and cost saving benefits. Whilst being competitively priced the solution is regarded as one of the most comprehensive systems on the market today. The consultancy services Topaz provide ranges from complex business process re-engineering to production of Gap analysis reports and ultimately technical specifications.

Topaz Financials covers all aspects of a financial accounting solution including sales, purchase and nominal ledgers, cashbook and fixed assets and specialise in key areas like credit control, commitment and project accounting. Their growing user base acknowledge the quality of software developed by Topaz but also the essential services and on-going support. Users come from a range of business sectors and include: Education, Recruitment, Manufacturing, Professional Services and Distribution.
